

Customer Churn Prediction & LTV Engine — Key Findings Identifying at-risk customers and prioritizing retention spend by predicted value

High Risk Count

2,058

High Risk Revenue at Stake

3,040,836

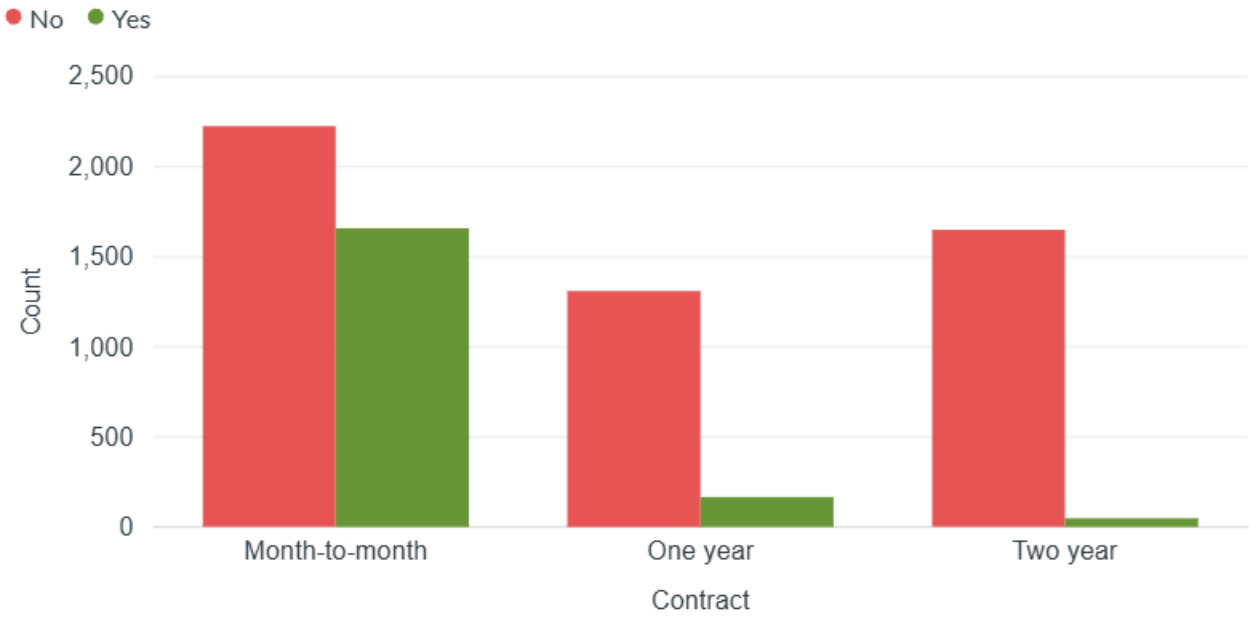

Safe Customers Count

4,224

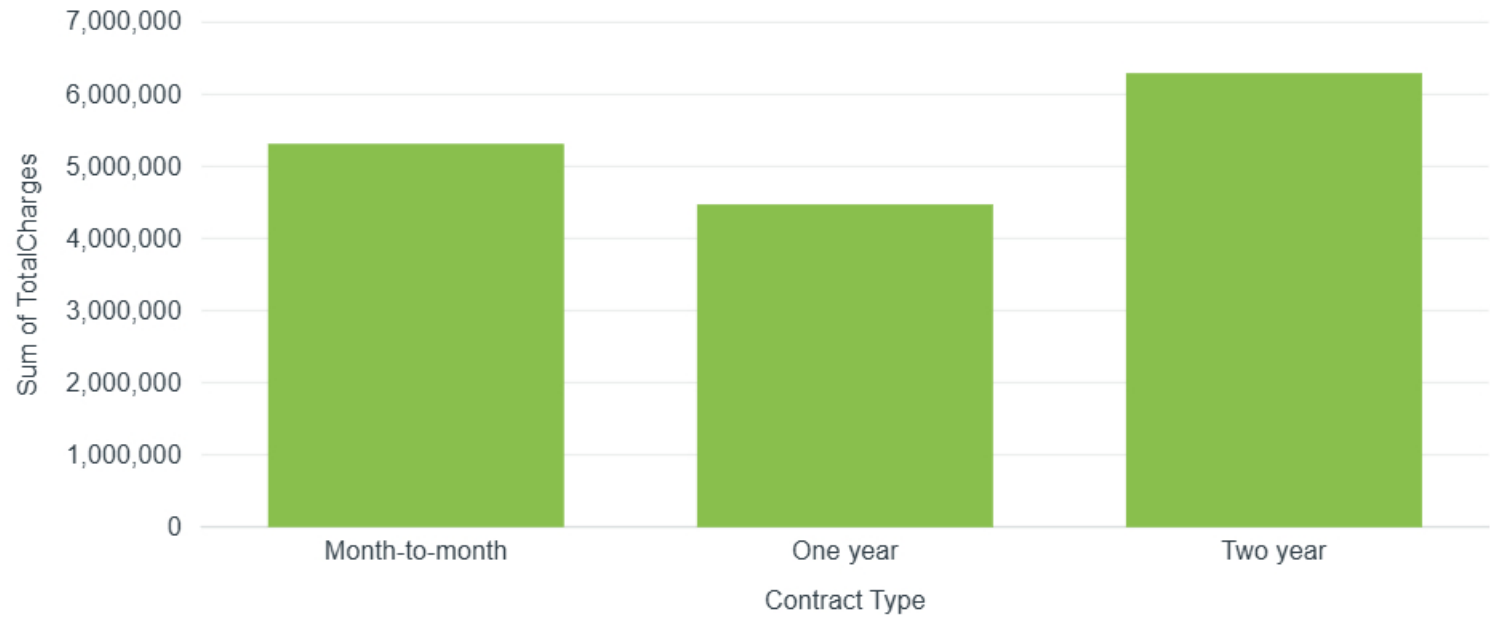

Month-to-month customers churn at ~42%, vs. under 3% for two-year contracts.

Despite high churn, month-to-month still contributes ~\$5.2M — uniform strategies waste budget either way.

Churn by Contract Type

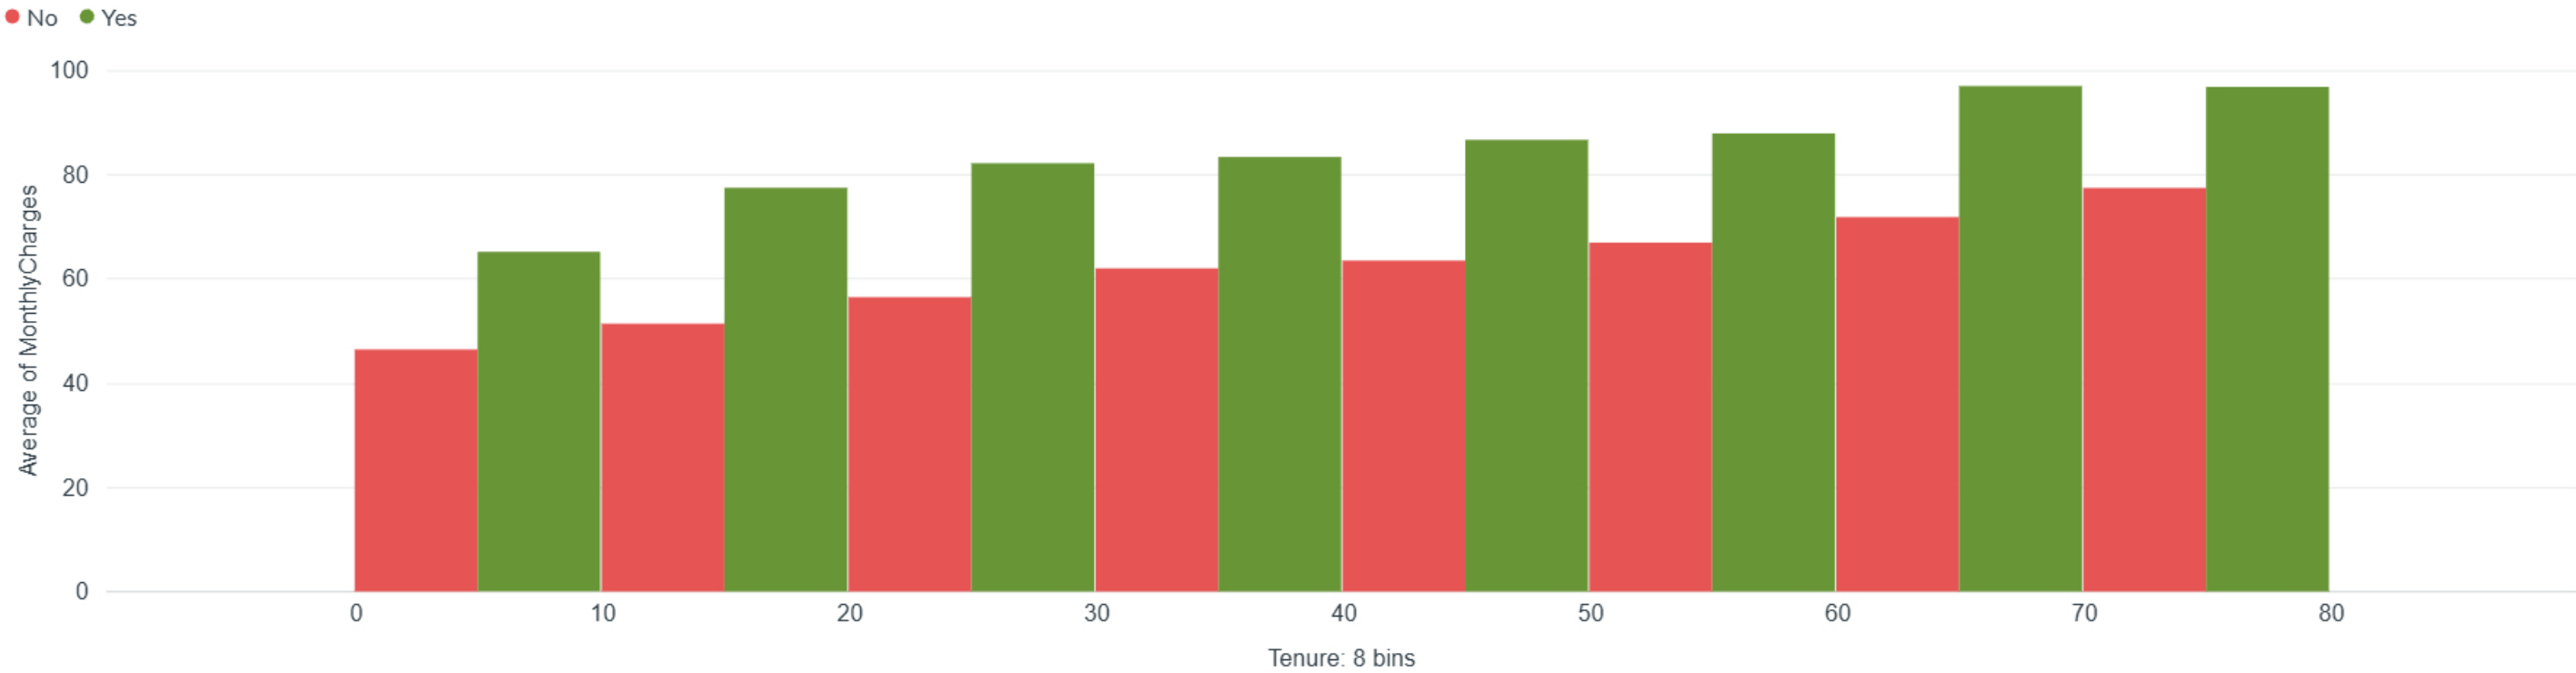

Revenue by Contract Type

Churned customers pay more per month than retained customers, at every tenure stage.

Avg Monthly Charges by Tenure & Churn

Every customer scored by our churn and LTV models. Top-right = high value, high risk — the priority segment for retention spend.

Churn Risk vs Predicted LTV
